

Professor Amedeo Chiribiri

Professor of Cardiovascular Imaging

Head of Department of Cardiovascular Imaging

King's College London | Guy's and St Thomas's NHS Foundation Trust

---

Prof Amedeo Chiribiri received his degree in Medicine from the University of Turin (Italy) with an experimental thesis on the role of coronary endothelium in the modulation of myocardial contractility in 2001. He completed his training in Cardiology in 2006 and received his PhD in Experimental Medicine and Human Physiology in 2011

After an experience as research fellow in human cardiovascular physiology at the University of Turin, during his training in cardiology he developed an interest in non-invasive cardiovascular imaging, in particular echocardiography, cardiac computed tomography and magnetic resonance imaging.

He leads the Cardiac MRI Service at Guy's and St Thomas' NHS Foundation Trust and is Professor of Cardiovascular Imaging at King's College London.

He is author/co-author of more than 300 scientific papers that appear in some of the most relevant international peer-reviewed journals and several book chapters.

His research is mainly focused on the non-invasive and high-resolution quantification of myocardial perfusion and assessment of coronary pathophysiology. He is Head of Department of Cardiovascular Imaging.
